流程图和普通图表的区别

1. 流程图基本上不会出现数据，**文字信息**占主要地位。
2. 流程图以描述为主，较少比较。
3. 流程图需要描述图中出现的**所有信息**，而普通图表则不需要描述每一个数据。
4. 流程图的时态比较单一，主要是用**一般现在时**。
5. 流程图的分段比较灵活，只要不同阶段之间的差距很明显，就可以另起一段。
6. 流程图有两种：一种是**工序图**，一般是描述一个产品是怎么制作的，服务是怎么提供的。另一种是**生物生长图**，一般是描述一个生物是怎么生长的。

流程图的常用表达

表示首阶段的一些说法：

- The process starts from + n. / V.ing
- At the first / initial stage, + 句子
- At the beginning of the cycle, + 句子
- During the initial phase, + 句子

表示次阶段的一些说法：

- The second stage is + n. / V.ing
- The next step in the process is + n. / V.ing

表示最后阶段的一些说法：

- The final phase of the procedure is about + n. / V.ing
- In the final phase, + 句子

词语的转换和连接词的使用：

单词的转换主要体现在名词转换成动词。流程图中经常会出现一些器具的名词，如grinder (/ˈgraɪndə/ 磨具), mixer (搅拌器), heater (加热器), 考生需要改成动词使用，如ground, mixed, heated.

传送	Deliver, send, transfer, transport
转化	Convert into, transform into
使用	Utilise, employ, use
扔掉/丢弃	Remove, throw away, dispose of
产生/制造	Produce, generate, create, make
连接词	Afterwards, subsequently, then, in the next step, after that, next, finally e.g. liquor butter在过滤之后，变成solid butter. • Liquor butter is filtered before being converted into solid butter. • Once liquor butter is filtered, it is converted into solid butter. • Liquor butter is filtered, until it is converted into solid butter. • ... , after which.... •, followed by

流程图的写作步骤

Step 1: 确定材料

- 每一个工序都有其使用的材料

Step 2: 确定工具

- 每一个工序都有其使用的工具

Step 3: 确定动词

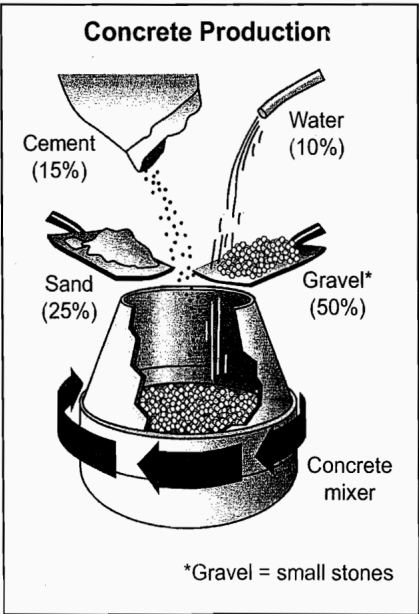

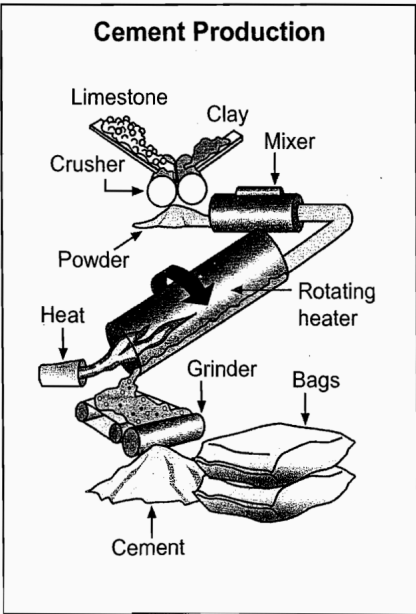

- 然后将这些信息写成一句话

流程图的写作步骤

The diagrams below show the stages and equipment used in the cement-making process, and how cement is used to produce concrete for building purposes.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

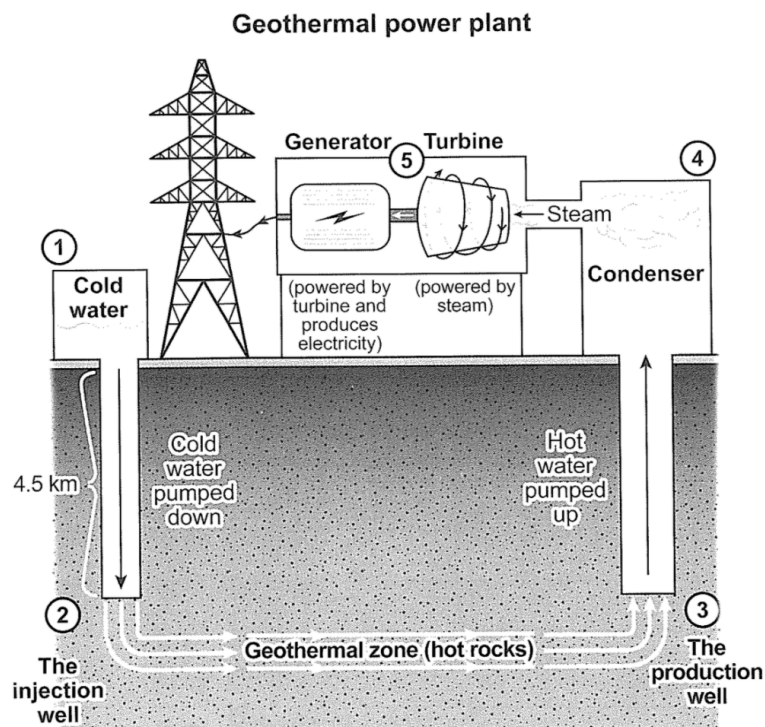

步骤1 确定材料是：	步骤2 确定工具是：	步骤3 确定动词是：
limestone和clay	Crusher	crush
句子：Limestone and clay are crushed by the crusher into powder.		
Power	Mixer	Deliver, mix
句子：Powder is delivered to the mixer, where it is mixed.		
Mixture	Rotating heater	Send, heat, rotate
句子：The mixture is sent to the rotating heater, in which it is heated and rotated .		
Powder	Conveyor belt, grinder	Place, grind
句子：Powder is placed on the conveyor belt.		
Powder	Grinder	Ground
句子：Powder is ground by the grinder into cement.		
Cement	Bags	Pack
句子：Cement is packed in bags.		
Cement, water, sand, gravel	Concrete, mixer	Rotate
句子：15% of cement, 10% of water, 25% of sand and 50% of gravel, four ingredients of concrete, are rotated in the concrete mixer.		

审题清单

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

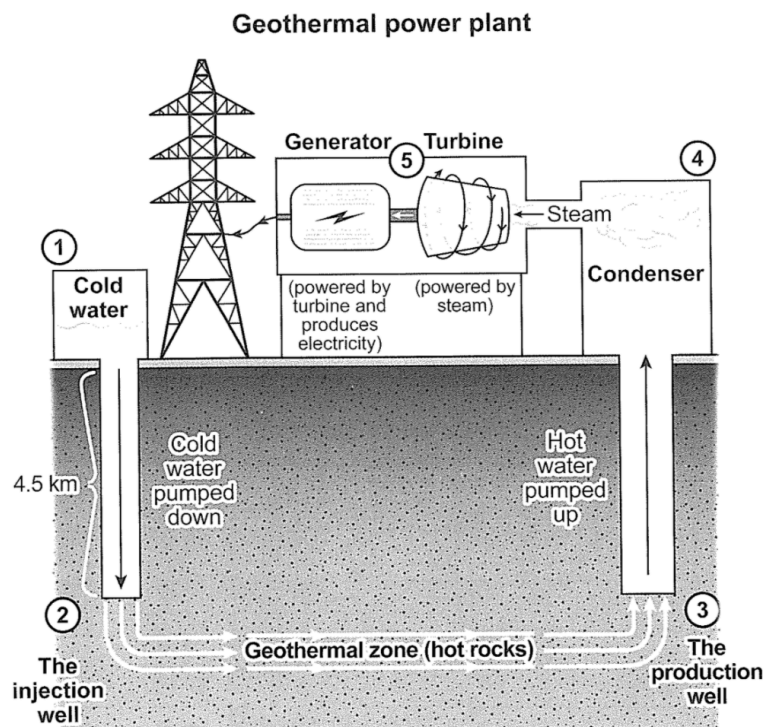

1. 流程的起点和终点分别是什么？
2. 总共有多少个阶段？
3. 这个流程是直线式的还是循环式的？
4. 每一个步骤(阶段)是什么？与上一个步骤(阶段)有什么关系？
5. 最终的结果有什么？有什么东西生产出来吗？
6. 这个流程能够分成两段吗？

审题清单

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

1. 流程的起点和终点分别是什么？

- Pumping water down
- generating electricity

2. 总共有多少个阶段？

- 5个

3. 这个流程是直线式的还是循环式的？

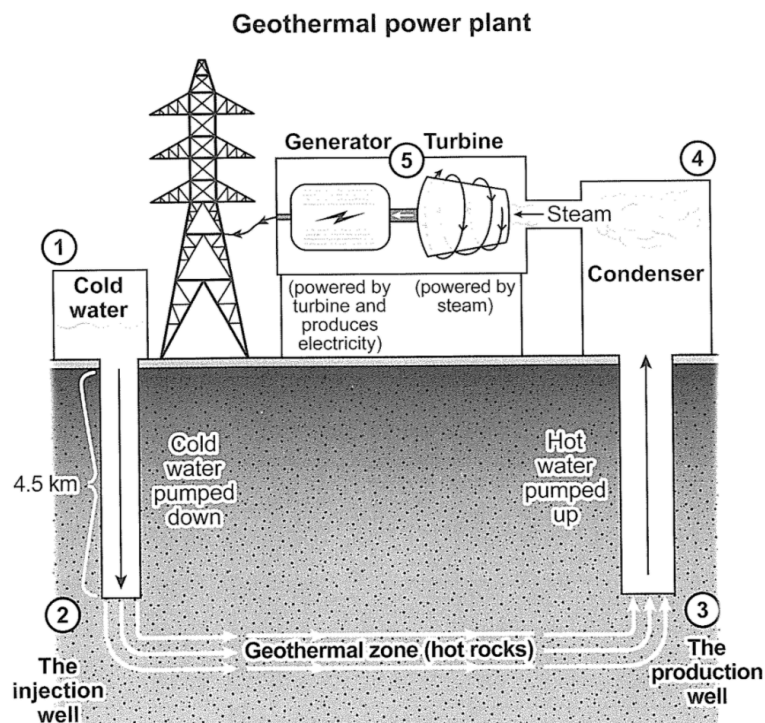

- 直线式的

审题清单

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

4. 每一个步骤(阶段)是什么? 与上一个步骤(阶段)有什么关系?

- **Pumping water down**
- **Heating water**
- **Pumping water up**
- **Compressing water into stream**
- **Generating electricity**

5. 最终的结果有什么？有什么东西生产出来吗？

- **Electricity**

6. 这个流程能够分成两段吗？

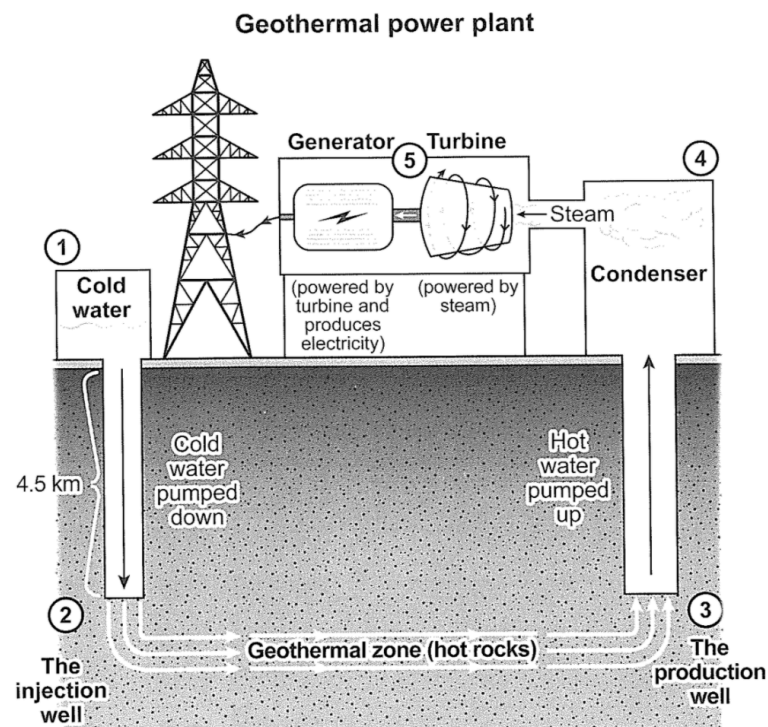

- **Underground / ground**

写作结构

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Introduction

- 改写题目 - 主谓宾

Overview:

- 有几个阶段，开头和结尾？

BP1:

- 有哪些步骤和顺序？

BP2:

- 其余的步骤和顺序？

题目分析

按照写作结构进行

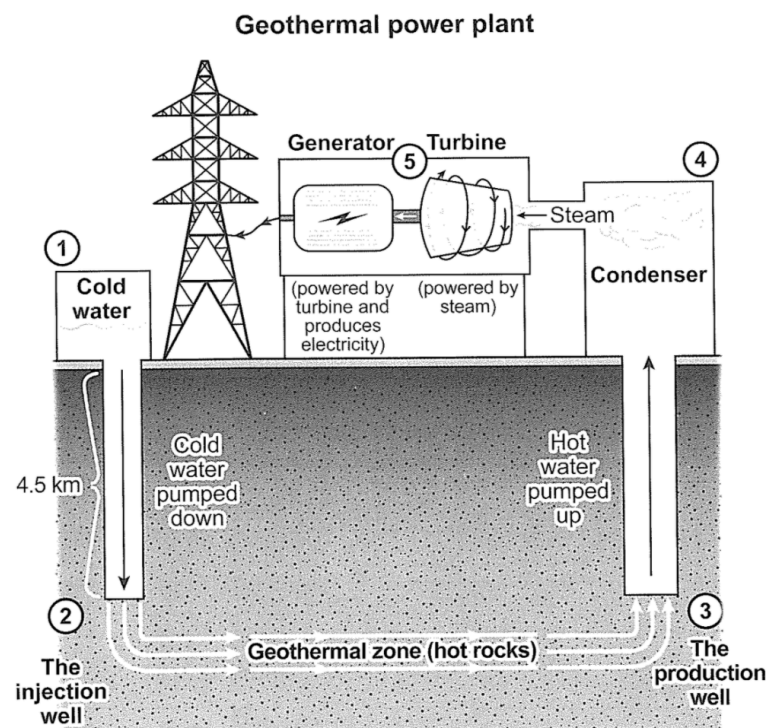

写作结构

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Introduction

- 主谓宾

Overview:

- Five stages

BP1: *Underground!*

- Pumping water down
- Heating water
- Pumping water up

BP2: *Ground!*

- Compressing water into stream
- Generating electricity

写作语言

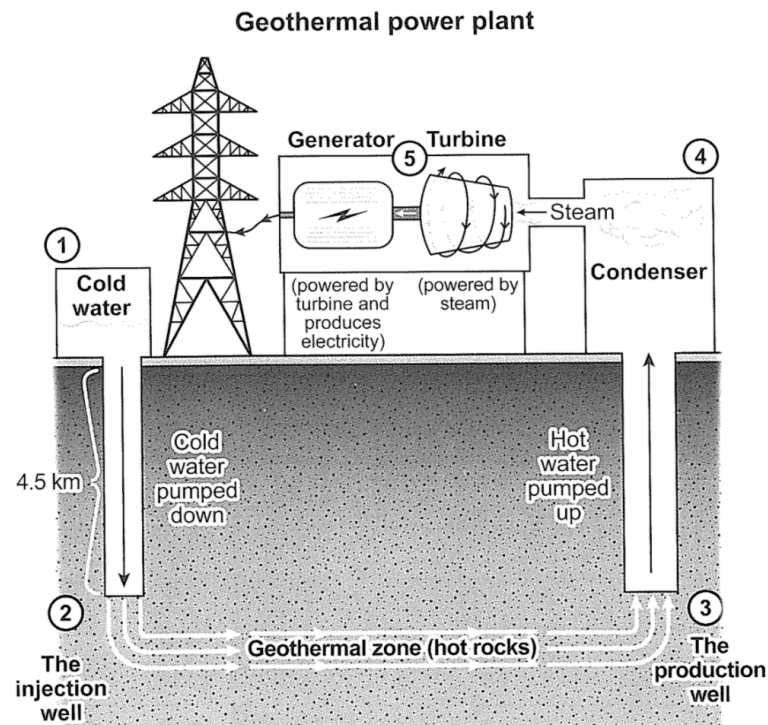

INTRODUCTION

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

1. 对象: process

2. 句型结构: 主谓宾

3. 参考表达:

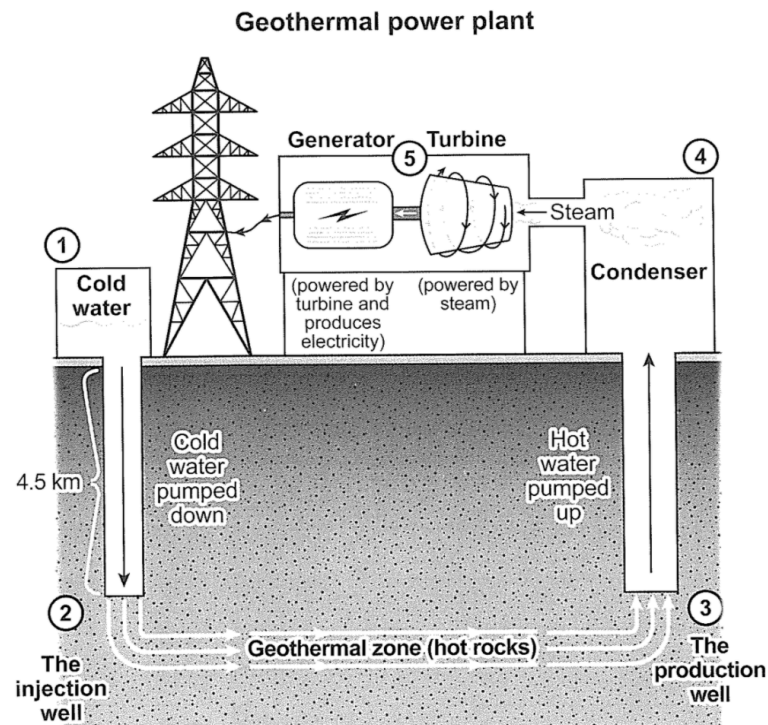

The diagram illustrates the process by which geothermal energy is utilized to generate electricity.

OVERVIEW

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Overall, there are five critical stages in this process,

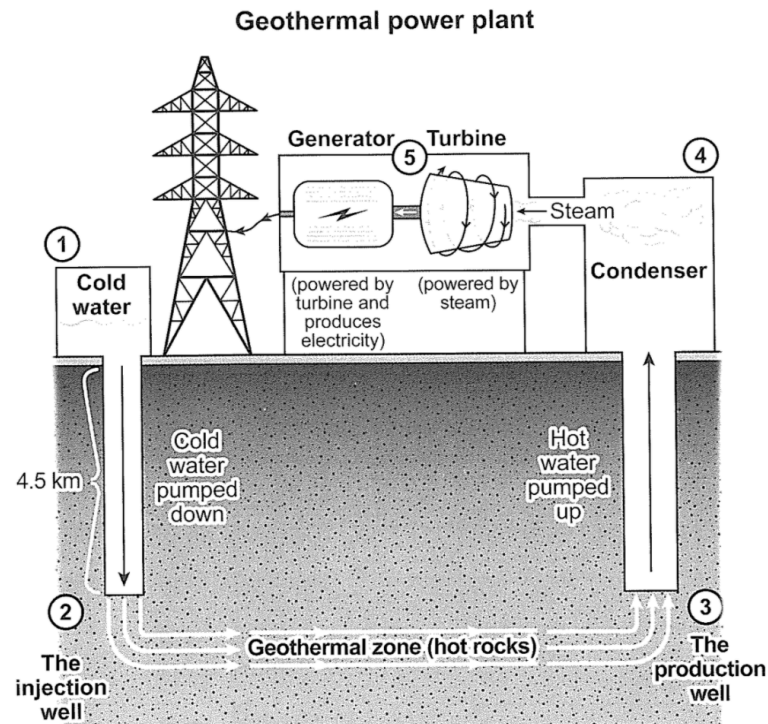

beginning with pumping cold water down and **ending with** delivering electricity to an electricity tower.

BODY PARAGRAPH 1

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

首先，将冷水储存在地面上的水箱中，然后通过注水井抽水至4.5千米。

在这之后，冷水流过由热岩组成的地热区进行加热。

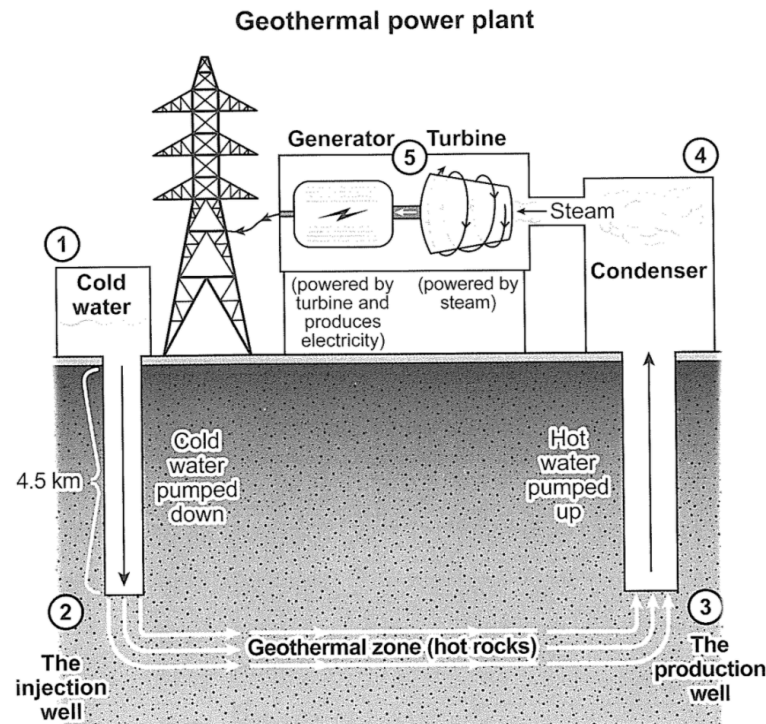

然后，热水被另一侧的生产井抽上来，送到位于地面的冷凝器中。

BODY PARAGRAPH 1

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

首先，将冷水储存在地面上的水箱中，然后通过注水井抽水至4.5千米。

First of all, cold water **is stored in** a tank on the ground and **then pumped down to** as much as 4.5 km through the injection well.

在这之后，冷水流过由热岩组成的地热区进行加热。

After this, cold water **flows through** a geothermal zone consisting of hot rocks **to be heated**.

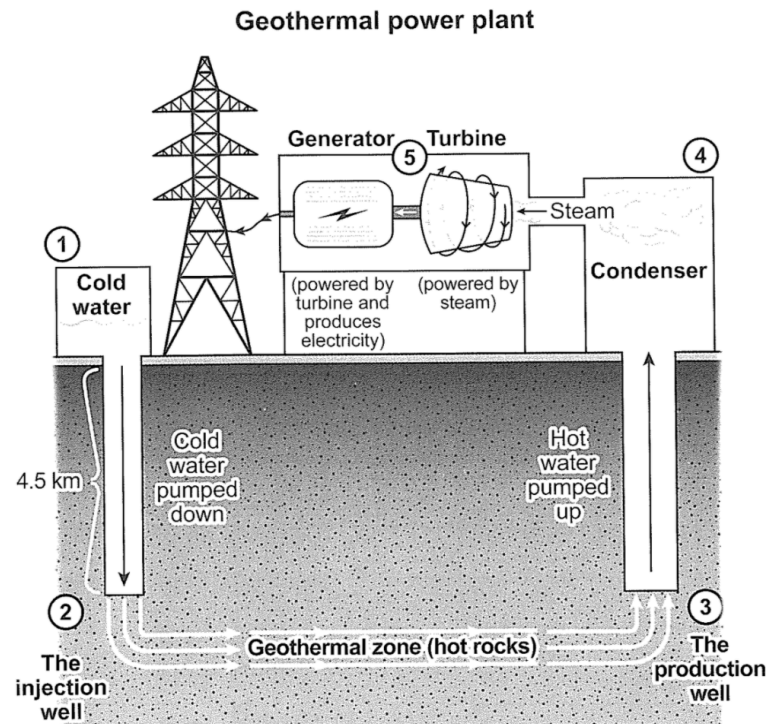

然后，热水被另一侧的生产井抽上来，送到位于地面的冷凝器中。**Then**, hot water **is pumped up** by the production well on the other side to a condenser located on the ground.

BODY PARAGRAPH 2

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

在冷凝器中，热水被转化为蒸汽，流入一个大的水箱，为汽轮机提供动力。

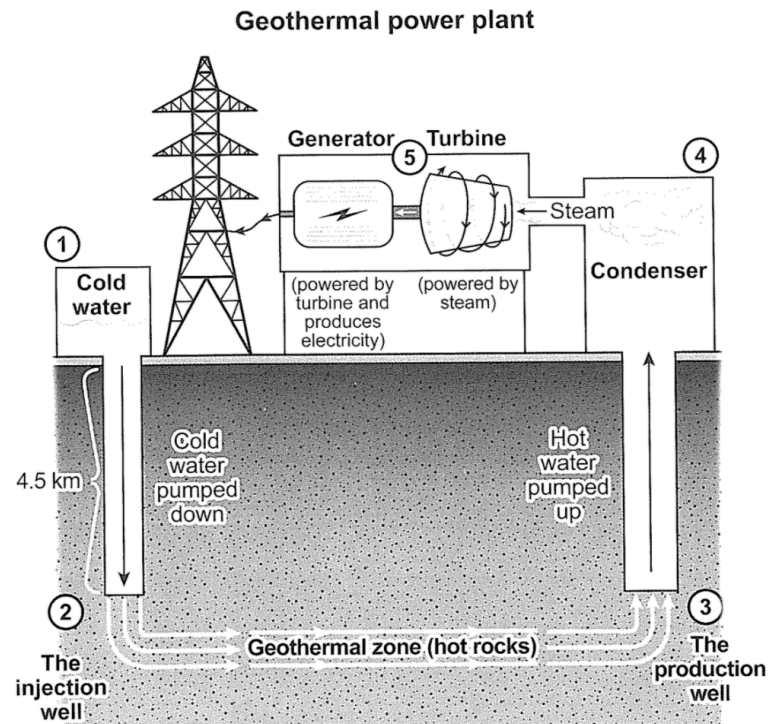

当水轮机旋转时，它将电能传递给正在发电的发电机，再将电能传递给电塔，整个过程就完成了。

BODY PARAGRAPH 2

The diagram below shows how geothermal energy is used to produce electricity.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

在冷凝器中，热水被转化为蒸汽，流入一个大的水箱，为汽轮机提供动力。In the condenser, hot water **is converted into** steam which **flows into** a large chamber to **power a turbine**.

当水轮机旋转时，它将电能传递给正在发电的发电机，再将电能传递给电塔，整个过程就完成了。When the turbine **is rotating**, it **transmits the power to** a generator that is producing electricity **and then transferring it to** an electricity tower, **and the whole process is completed**.

THE SAMPLE ANSWER

- The diagram illustrates the process by which geothermal energy is utilized to generate electricity.
- Overall, there are five critical stages in this process, beginning with pumping cold water down and ending with delivering electricity to an electricity tower.
- First of all, cold water is stored in a tank on the ground and then pumped down to as much as 4.5 km through the injection well. After this, cold water flows through a geothermal zone consisting of hot rocks to be heated. Then, hot water is pumped up by the production well on the other side to a condenser located on the ground.
- In the condenser, hot water is converted into steam which flows into a large chamber to power a turbine. When the turbine is rotating, it transmits the power to a generator that is producing electricity and then transferring it to an electricity tower, and the whole process is completed.

HOMework

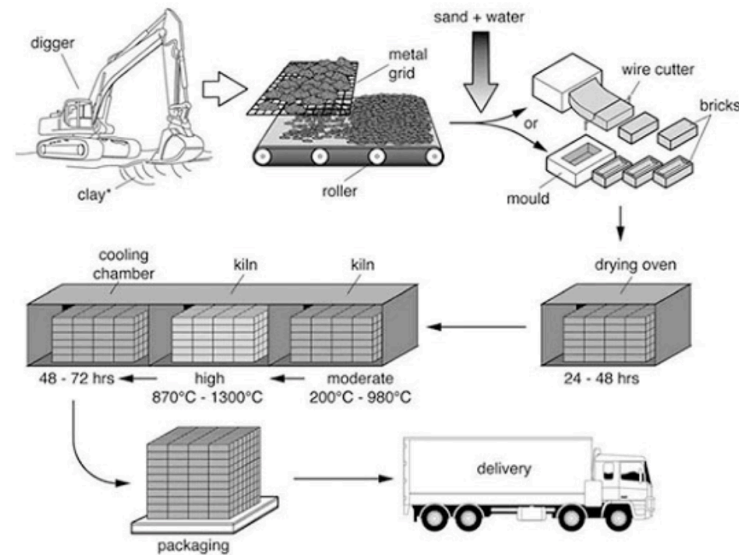

You should spend about 20 minutes on this task.

The diagram illustrates the process that is used to manufacture bricks for the building industry.

Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.

The Brick Manufacturing Process
