

【教育】 OPINION - 大学学费是否应该每个人都免费 (everyone)

 政府支出类话题（太空探索、投资艺术、免学费、为个人和公司的污染买单、prison）（政府要不要给钱？）

- Governments = the government = nations = countries = states = policymakers = those in power = authorities
- Public budget / funding / money / capital 公共预算
- Financial support 财政支持
- The public = members of the public
- Collect money from taxpayers
- tax fast food 给快餐征税 / impose a tax on fast food / introduce extra taxes on fast food

 public money is limited / insufficient
公共预算是有限的/ 不足的

 如果政府在某个领域花钱多了

1 其他更有需要的领域钱少了

- Other much needed areas
- Other crucial areas
- Other essential fields
- Other critical fields
- Healthcare (=health system)
- Education
- Infrastructures (=hospitals, schools, roads, bridges..)
- Public facilities (=parks, squares, libraries..)
- Tighten public budgets invested in other much needed areas, such as ...

2 不得不向纳税人征税，收入减少，在其他领域的花费少了，生活质量受到影响

- To bear / cover this substantial cost, governments have to collect money from taxpayers, which may result in a rise in taxation (tax rates; taxes) .
- This rise in taxes **would lead to** a decline in income of members of the public,

reducing expenditures on other aspects of life, which may lower their quality of life to some extent.

The quality of life

The standard of living

To some extent = more or less

例题分析 3

In order to study at university students are required to pay expensive tuition fees. Not all students can afford them so some people think that university education should be free for everyone. To what extent do you agree or disagree?

• 本题观点只有一个：大学学费是否应该对每个人免费

• 参考立场1 部分赞同

BP2: 对于一些经济实力有限的国家，不应该对每个人都免费。

大学没有收入 → 依赖国家对教育的财政投入 → 其他民生领域得不到钱 → 对于大多数国家，这不可行

【中心句】 put a tremendous financial strain on a country.

【解释】 Universities would have no income from fees

→ they would rely completely on the state for funding.

→ taking funds from other much needed areas (the health system) to allocate money to universities

【结果】 For the majority of countries, particularly developing and underdeveloped countries, this would not be a financially viable option.

- *School : primary school, middle school, secondary school*
- *University : higher education , tertiary education*

1 BP1: 什么情况下，这个题目是成立的？（大学应该免学费）

- *发达国家，可以免费*
- *解释：有实力，负担得起*
- *结果：(1) 对于学生，有机会，有利于找到好工作；(2) 对于社会 well-educated workforce, benefit society*

对于孩子们来说，他们不会因为经济困难而辍学，这大大促进了教育的平等（解释说明-优点1）

For children, they will not drop out of school because of financial difficulties, which significantly promotes equality in education. For students, they will not be deprived of the opportunity of entering universities due to financial difficulties, which significantly promotes equality in education.

如果没有这项慷慨的计划，经济条件较差的父母可能会很难送子女上学（反向论证） Without this generous scheme, less well-off parents may struggle to send their offspring to school.

high school graduates may struggle to get a decent job or get promoted in the long run.

对社会而言，助学可以极大地增加受教育的人口，这意味着未来将有一大批受教育的劳动力。

For society, sponsored schooling can dramatically boost the population of schooled children, which means that in the future, there will be a large group of educated workforce.

sponsored education = get rid of tuition = abolish fees

well-educated workforce

这对一个国家未来的发展至关重要，因为历史证明，一个国家的人才越多，国家就越能快速进步，越能繁荣昌盛。 This is vital for a country's future development, as the history has proven that the more talents a nation has, the more rapidly it can advance and become more prosperous.

2 BP2: 什么情况下，这个题目是不成立的？（大学不应该免学费）

- 大多数国家，尤其是发展中国家，免不了
- *For the majority of countries, especially underdeveloped and developing countries, this would not be a financially viable option.*

这是因为大学教育的成本很高，这些国家的公共预算通常是以这些方式紧缩的：通过医疗卫生、基础设施项目等其他基本领域的支出。为了承担这笔巨额费用，政府不得不向纳税人收取更多的钱。 This is because higher education is costly, and the public budgets of these countries have been usually tightened by spending on other essential fields such as healthcare, infrastructure projects. To bear the substantial cost, governments have to collect more money from taxpayers.

如上所述，德国以高税率著称 Germany, as mentioned above, is well-known for its high tax rates.

税收的增加会导致市民的收入减少，减少了市民在其他生活方面的支出，从而在一定程度上降低了市民的生活质量。 This rise in taxation can result in a decrease in the income of members of the public, reducing their expenditures on other aspects of life, which, consequently, may lower their quality of life to some extent.
