Disadvantages of totally or partially free child education:

题目分析

Advantages/Disadvantages题型分为两类：一种是分别讨论优点缺点，不需要有自己的观点（G类较多）；另一种是要分别讨论优点缺点，同时要比较，并且给出自己的观点（A类较多）；这个题目是要比较优点和缺点的，值得注意的是，**outweigh**比较的是重要性，而不是数量（**outnumber**）。如果认为优点大于缺点，可以先写缺点，再写优点，这个题目可以采用这个写法。

如上所述，德国以高税率著称 Germany, as mentioned above, is well-known for its high tax rates.

税收的增加会导致市民的收入减少，减少了市民在其他生活方面的支出，从而在一定程度上降低了市民的生活质量。This rise in taxation can result in a decrease in the income of members of the public, reducing their expenditures on other aspects of life, which, consequently, may lower their quality of life to some extent.

对社会而言，助学可以极大地增加受教育的人口，这意味着未来将有一大批受教育的劳动力。

For society, sponsored schooling can dramatically boost the population of schooled children, which means that in the future, there will be a large group of educated workforce.

这对一个国家未来的发展至关重要，因为历史证明，一个国家的人才越多，国家就越能快速进步，越能繁荣昌盛。 This is vital for a country's future development, as the history has proven that the more talents a nation has, the more rapidly it can advance and become more prosperous.

CONCLUSION

最后，我想说的是，虽然政府提供免费的儿童教育可能会产生一些不必要的反响，但学生们可以从中受益匪浅，一个包含大量受过教育的劳动者的文化一般都会比较成功。

In conclusion, I would argue that although some unwanted repercussions may arise if governments provide free child education, students can be greatly benefited and a culture containing a large number of educated workers will generally be more successful. (my view).

我希望全世界的政策制定者都能意识到这一点，将来也能效仿。

I wish policy-makers over the world could realize this and follow the suit in the future.

THE SAMPLE ANSWER

- Nowadays, many nations around the world have provided free education for children. In Germany, the government covers the educational expense from kindergarten to high school. The question is whether this policy adopted by these countries can bring more positivity or negativity.
- A primary disadvantage of this policy is the increase in the tax burden of citizens. This is because child education is costly, and the public budgets of these countries have been usually tightened by spending on other essential fields such as healthcare, infrastructure projects. To shoulder the substantial cost, governments have to collect more money from taxpayers. Germany, as mentioned above, is well-known for its high tax rates. This rise in taxation can result in a decrease in the income of members of the public, reducing their expenditures on other aspects of life, which, consequently, may lower their quality of life to some extent.
- However, this approach can bring significant merits to children and society alike. For children, they will not drop out of school because of financial difficulties, which significantly promotes equality in education. Without this generous scheme, many less well-off parents may struggle to send their offspring to school. For society, sponsored schooling can dramatically boost the population of schooled children, which means that in the future, there will be a large group of educated workforce. This is vital for a country's future development, as the history has proven that the more talents a nation has, the more rapidly it can advance and become more prosperous.
- In conclusion, I would argue that although some unwanted repercussions may arise if governments provide free child education, students can be greatly benefited and a culture containing a large number of educated workers will generally be more successful. I wish policy-makers over the world could realize this and follow the suit in the future. (~306 words)
