

【社会】 ADVANTAGE - Children paid work 童工

Some people think that it is beneficial for children to do paid work, while others think it can be harmful for children. What are the advantages and disadvantages of children doing paid work? (Do you think the advantages outweigh the disadvantages?)

Introduction

Although paid work is thought by some to be a useful experience for children, other people consider that can be detrimental.

Children can learn about earning money and gain independence from doing paid work but there are also drawbacks to be taken into account. (In my opinion, I think that paid work can bring about (导致) more problems for children compared to any advantages it might bring)

📌 Advantages of children doing paid work = 金钱观 💰 + 独立和责任

- Learn the value of money → it teaches them hard work + not to waste money
 - appreciate the hard work needed to earn money
- Learn to manage money → older children PT jobs → save → afford
- Responsibility and independence → adults ready for society

📌 Disadvantages of children doing paid work = 被剥削 🏃 + 学习 🎒

- Exploitation (剥削) / slave labour (苦役) → developing countries,
 - no legal protection + do hard manual work (做苦力) = negligible /ˈneglɪdʒɪb(ə)l/ wages
 - Do not focus on school work → importance of grades = future

📌 主体段论述

📌 BP1 - Advantages

- Admittedly (诚然, 该词一般用作“do you think”一类的议论文体的中心句, 后面跟弱观点), there are some basic/minor benefits of children working for money. (又如 looking at the advantages, a basic one is

that..)

- Firstly, one benefit of children doing paid work is that they develop an understanding of the value of money. This also teaches them not to waste money and helps them appreciate the hard work needed to earn it.
- Secondly, children take their first steps in learning how to manage and save money. Many older children, for instance, have a part-time job in order to save up for something they would otherwise be unable to afford. Understanding money management, furthermore, is useful when they will need to balance their finances as adults.
- Thirdly, working teaches children responsibility and independence. These skills help children develop into self-supporting adults ready to enter society and the workforce.

BP2 - Disadvantages

- Nevertheless, despite the advantages above, I believe children could face serious drawbacks from paid work. (又如However, this approach can bring significant merits to children and society; the disadvantages of this trend should not be understated, a major one among which is that ...)
- (** 如果认为利大于弊 , BP2首句可写 Despite the drawbacks below, I believe the benefits gained by children doing work experience are extremely useful for their future. 在BP1写问题时也可加入个人观点 “However, this situation is rare, only happening in certain countries”,并且从用词上弱化 , 比如 basic / minor issues, might, could等)

- On the other hand, one potentially dangerous problem when children have a job is that it potentially exposes them to exploitation through slave labor. For example, in some developing countries that do not enforce child employment laws, children are made to work under extreme conditions or even in life threatening situations for negligible wages (As a result, they are paid negligible wages for work that can be tough, manual work.) . Starting life in this way makes it almost impossible for them to escape poverty as an adult.
- Another obvious issue is that the time children spend working prevents them from focusing on their school work. This is a concern since having a good education is the key to a successful future, and therefore being employed as a child can result in a poor academic performance which can be harmful in the long run.

Conclusion

- In conclusion, while children can benefit from some work experience, it can also lead to exploitation or lower grades at school.
- In conclusion, being exploited or struggling with academic grades far outweighs any of the minor benefits that could result from children being involved in work experience.
